About Us…

Bettersafe are focused on delivering innovative safety solutions to niche markets, and quality in service and product.

With over 40 years of experience in the safety, distribution and global market our team strive to push the limit on service and solution, seeking new products from all over the globe and bringing them together in Bettersafe International.

With operations in the Netherlands, United Kingdom, New Zealand, Brazil, Germany, France, and Spain, and partners in the US, Canada, Australia, Asia and across Europe Bettersafe International are truly a global company.
Fall protection is a complicated issue and one of the most important faced by an employer or worksite supervisor.

With an increasing number of reported incidents per year, falls from heights almost always result in serious injury.

Falls from height remain the most common cause of workplace fatality with over 35 fatalities, over 4500 major injuries and 7000 injuries leading to 3 or more days off work every year.

As part of the Safety Regulations those involved in work at height must be competent.

What is ‘work at height’?

A place is ‘at height’ if a person could be injured falling from it, even if it is at or below ground level.

The Work at Height Regulations 2005 apply to all work at height where there is a risk of a fall liable to cause personal injury. They place duties on employers, the self-employed, and any person who controls the work of others (eg facilities managers or building owners who may contract others to work at height) to the extent they control the work.”
With a full range of Fall Protection Equipment, Bettersafe International are your perfect partner for Height Safety.
